

RE: Results from bacteria sampling at Bayswater Beach Provincial Park on August 27, 2020.

Table 1. Health Canada Guidelines for Canadian Recreational Water Quality (Health Canada, 2012).

Level of Contact with Water	Definition	Health Canada E. coli Guideline (CFU/100 mL)
Primary Contact	Activities in which the whole body or the face and trunk are frequently immersed or the face is frequently wetted by spray, and where it is likely that some water will be swallowed (e.g., swimming, surfing, waterskiing, whitewater canoeing/rafting/kayaking, windsurfing, subsurface diving).	≤ 400 CFU/100 mL (single sample maximum)
Secondary Contact	Activities in which only the limbs are regularly wetted and in which greater contact (including swallowing water) is unusual (e.g., rowing, sailing, canoe touring, fishing).	≤ 1000 CFU/100 mL

Table 2. E. coli bacteria results from August 27, 2020 at Bayswater Beach Provincial Park.

Sample Site	Sampling Date	E. coli Bacteria Results
Site 1	August 27, 2020	20 CFU/100 mL
Site 2	August 27, 2020	<10 CFU/100 mL
